PROFESSIONAL SUMMARY

Motivated B.Tech Artificial Intelligence & Data Science student with a strong foundation in Python, Java, Machine Learning, and Computer Vision. Experienced in developing AI-powered real-world applications, including a face-recognition-based Smart Attendance System built with OpenCV and MySQL. Passionate about leveraging AI and software development to solve complex problems innovatively. Seeking internship opportunities where I can apply my skills, collaborate with cross-functional teams, and contribute to impactful technology solutions across AI, software engineering, and data-driven domains.

EDUCATION

VSB Engineering College | Anna University

Expected Mar 2029

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Current CGPA: 7.55

TECHNICAL SKILLS

Programming Languages

Python · Java · C

AI / Machine Learning

Machine Learning (Fundamentals) · Computer Vision · Face Recognition · OpenCV

Core CS Subjects

OOP · DBMS · Data Structures & Algorithms (Learning) · Problem Solving

Databases

MySQL · SQL

Developer Tools

Git · GitHub · Visual Studio Code

INTERNSHIP

Web Development Intern | Brainery Spot Technology

Internship Program

- Participated in a structured web development internship, gaining hands-on exposure to modern development workflows and best practices.
- Collaborated with a development team on project-based tasks involving front-end implementation, debugging, and code review processes.
- Developed practical skills in software collaboration, iterative problem-solving, and delivering solutions under professional guidance.
- Enhanced understanding of software development lifecycle (SDLC) and project documentation within an industry setting.

PROJECTS

Smart Attendance System using Face Recognition

[Python](#) · [OpenCV](#) · [Face Recognition Library](#) · [MySQL](#) · [Git](#) · [GitHub](#)

- Architected and developed an AI-powered attendance management system that automatically identifies registered students using facial recognition technology, eliminating manual attendance processes.
- Implemented real-time face detection and recognition pipeline using OpenCV and the face_recognition library, applying core Computer Vision concepts to achieve accurate identification.
- Designed and integrated a structured MySQL database schema for secure and efficient storage of student profiles, registration data, and timestamped attendance records.
- Built a complete student registration module enabling seamless onboarding of new users with image capture and database entry.
- Reduced manual attendance errors and improved tracking accuracy by automating the identification workflow using Python-based AI logic.

CERTIFICATIONS

► Introduction to AI & ChatGPT

► Programming Fundamentals using Python

► Basics of Python

SOFT SKILLS

Problem Solving · Team Collaboration · Communication
Adaptability · Time Management · Quick Learner · Analytical Thinking
